# KATA PENGANTAR

**B**enchmark indeks konstruksi bertujuan untuk menyajikan data yang selaras antara hasil Survei Perusahaan Konstruksi Triwulan dan Survei Perusahaan Konstruksi Tahunan. Melalui publikasi ini akan terlihat perkembangan sektor konstruksi Indonesia selama tahun 2018–2023.

Kondisi sektor konstruksi Indonesia yang dicakup dalam publikasi ini meliputi beberapa indikator, yaitu: pekerja tetap, hari-orang, balas jasa dan upah, balas jasa pekerja tetap, upah pekerja harian, dan nilai konstruksi yang diselesaikan menurut provinsi tahun 2018–2023. *Benchmark* indeks konstruksi setiap provinsi diperoleh dengan cara menetapkan tahun tertentu yaitu tahun 2016 sebagai tahun dasar. Selanjutnya, data pada tahun tersebut digerakkan dengan *benchmark* pertumbuhan tahunan sebelum dan sesudahnya untuk memperoleh data yang selaras. Buku ini merupakan salah satu dari dwilogi publikasi yang diluncurkan serentak, yaitu:

1. **Benchmark Indeks Konstruksi (2016=100), 2018–2023**
2. **Benchmark Statistik Konstruksi, 2018–2023**

Akhirnya, pada kesempatan ini kami mengucapkan terima kasih dan penghargaan yang sebesar-besarnya kepada semua pihak yang terlibat pada pendataan dan pengolahan data sehingga publikasi ini dapat terwujud.

Jakarta, Oktober 2025  
Kepala Badan Pusat Statistik

**Amalia Adininggar Widyasanti**

# PREFACE

**B**enchmark of Construction Indices provides data aligned between the result of The Quarterly Construction Establishment Survey and The Annual Construction Establishment Survey. This publication also describes the trend of the construction sector in Indonesia from 2018 to 2023.

The Indonesian construction sector in this publication cover some indicators: permanent workers, mandays, compensation and wages, compensation of permanent workers, wages of casual workers, and value of construction works completed by province starting from 2018 to 2023. Benchmark of construction indices is obtained by setting a certain year, 2016, as a base year. The data is then driven by the previous and the subsequent annual growth benchmark to obtain harmonized data. This book is one of the dwilogic of publications launched simultaneously, as follows:

## 1. Benchmark of Construction Indices (2016=100), 2018–2023

## 2. Benchmark of Construction Statistics, 2018–2023

Finally, we would like to express our gratitude to all parties, who have given contribution in collecting and processing data so that this publication could be accomplished.

Jakarta, October 2025

**PENJELASAN**  
*Explanation*

# PENJELASAN

## EXPLANATION

### LATAR BELAKANG

Publikasi *Benchmark* Indeks Konstruksi bertujuan untuk menunjukkan perubahan atau pertumbuhan dari kegiatan perusahaan sektor konstruksi periode triwulanan dan tahunan. Data yang digunakan untuk menyusun indeks konstruksi tersebut adalah Survei Perusahaan Konstruksi Triwulanan (SKTR) dan Survei Perusahaan Konstruksi Tahunan (SKTH). Fluktuasi data pada indikator konstruksi triwulanan seharusnya sejalan dengan fluktuasi data konstruksi tahunan. Akan tetapi, masih terdapat perbedaan fluktuasi antara keduanya. Oleh karena itu, dilakukan *benchmarking* untuk menyesuaikan fluktuasi tersebut.

### RUANG LINGKUP

Statistik konstruksi yang dijadikan sebagai dasar data *benchmarking* ini adalah hasil Survei Perusahaan Konstruksi Triwulanan tahun 2018 sampai dengan 2023, Survei Perusahaan Konstruksi Tahunan tahun 2018 sampai dengan 2023, dan Sensus Ekonomi 2016.

Series data yang digunakan dalam *benchmarking* adalah:

- a. Indeks dan Banyaknya Pekerja Tetap Konstruksi.
- b. Indeks dan Banyaknya Hari-Orang Pekerja Tidak Tetap/Harian Konstruksi.
- c. Indeks dan Nilai Balas Jasa dan Upah Pekerja Konstruksi.
- d. Indeks dan Nilai Balas Jasa Pekerja Tetap Konstruksi.
- e. Indeks dan Nilai Upah Pekerja Tidak Tetap/Harian Konstruksi.
- f. Indeks dan Nilai Konstruksi yang Diselesaikan.

### INTRODUCTION

*Benchmark of Construction Indices aims to show the changes or growth of construction activities quarterly and annually. Data to be used in developing construction indices is sourced from Quarterly Construction Establishments Survey (SKTR) and Annual Construction Establishments Survey (SKTH). Data fluctuation in quarterly construction indicators must be in line with the fluctuation of annual construction data. However, there are still differences between those fluctuation. Therefore, bechmarking is performed in order to adjust the data fluctuation of those two indicators.*

### COVERAGE

*Construction statistics to be used for basic data is from Quarterly Construction Establishments Survey from 2018 to 2023, Annual Establishment Construction Survey from 2018 to 2023, and 2016 Economic Census.*

*Data series used for benchmarking are:*

- a. *Indices and Number of the Construction Permanent Workers.*
- b. *Indices and Number of Mandays of Construction Casual Workers.*
- c. *Indices and Value of Compensation and Wages of Construction Workers.*
- d. *Indices and Value of Compensation of Construction Permanent Workers.*
- e. *Indices and Value of Wages of Construction Casual Workers.*
- f. *Indices and Value of Construction Works Completed.*

## KONSEP DAN DEFINISI

### 1. Konstruksi

Konstruksi adalah suatu kegiatan yang hasil akhirnya berupa bangunan/konstruksi yang menyatu dengan lahan tempat kedudukannya. Hasil kegiatan konstruksi antara lain: gedung, jalan, jembatan, rel dan jembatan kereta api, terowongan, bangunan air dan drainase, bangunan sanitasi, bandara, jaringan listrik dan komunikasi, dan lain-lain.

### 2. Perusahaan

Perusahaan adalah suatu badan yang melakukan kegiatan ekonomi, bertujuan menghasilkan barang/jasa, terletak di suatu bangunan fisik pada lokasi tertentu, dan mempunyai catatan administrasi tersendiri. Badan usaha perusahaan konstruksi dapat berbentuk PT, CV, PT (Persero), Koperasi, dan lainnya.

### 3. Pekerja

Pekerja adalah semua orang yang pada saat pencacahan bekerja di perusahaan, baik pekerja teknik maupun pekerja non teknik. Pekerja dibagi dalam dua kategori yaitu pekerja tetap dan pekerja harian.

- a. Pekerja tetap adalah pekerja yang bekerja pada perusahaan dengan menerima balas jasa/gaji secara tetap, baik ada kegiatan maupun tidak ada kegiatan.
- b. Pekerja harian adalah pekerja yang tidak terikat secara tetap dengan perusahaan, dimana mereka hanya bekerja selama pekerjaan/proyek ada dan bila pekerjaan/proyek telah selesai, maka secara otomatis mereka tidak mempunyai hubungan kerja lagi dengan perusahaan.

### 4. Hari-Orang Pekerja Harian

Hari-orang adalah jumlah pekerja harian dan hari yang dibutuhkan untuk menyelesaikan suatu pekerjaan.

### 5. Balas Jasa Pekerja Tetap

Balas jasa adalah seluruh pengeluaran yang dibayarkan kepada pekerja tetap berupa upah gaji, upah lembur, hadiah, bonus, dana pensiun, tunjangan kecelakaan dan pengeluaran lainnya yang dibayarkan dalam bentuk uang maupun barang sebagai balas jasa.

## CONCEPT DAN DEFINITION

### 1. Construction

*Construction is an activity to build construction stated by their location. The results of construction activities are building construction, road, bridge, railway and rail bridge, tunnel subway, waterwork and drainage, sanitary construction, airport, electricity and communication network, etc.*

### 2. Establishment

*Establishment is an economic activity unit to produce goods or services, located in a certain physical building, which has its own administration record. The type of legal entity of construction establishment consists of: Limited Company, Limited Partnership, State Owned Company (local and national), Co-operation, and others.*

### 3. Worker

*Worker is a person who works in an establishment during enumeration, which includes technical worker and non-technical worker. Worker is divided into two categories, they are: permanent workers and casual workers.*

- a. *Permanent worker is a worker who works at the establishment and receives fixed compensation/salaries without depending on the availability of activities.*
- b. *Casual worker is a worker who works during the project and has no permanent relationship with the company when the project has been completed.*

### 4. Mandays of Casual Worker

*Mandays is the number of casual worker and days needed to complete a job.*

### 5. Compensation of Permanent Worker

*Compensation is all expenses paid to the permanent worker in the form of wage/salary, overtime payment, gifts, bonuses, pension funds, accidental allowance and other expenses either in the form of money or goods as compensation.*

## **6. Upah Pekerja Harian**

Upah adalah seluruh pengeluaran yang dibayarkan kepada pekerja harian yang dibayarkan dalam bentuk uang maupun barang sebagai balas jasa.

## **7. Nilai Konstruksi yang Diselesaikan**

Nilai konstruksi yang diselesaikan adalah nilai pekerjaan yang telah diselesaikan oleh pihak pemberong menurut realisasi proyek yang telah diselesaikan dalam jangka waktu tertentu, berdasarkan nilai kontrak antara pemilik dengan kontraktor.

## **METODOLOGI**

### **1. Sampel**

Survei Perusahaan Konstruksi Tahunan mencakup badan usaha konstruksi yang beroperasi di Indonesia.

Pada kegiatan Survei Perusahaan Konstruksi Tahunan 2023, dipilih sampel sebanyak 10.000 perusahaan meliputi perusahaan skala kecil, menengah, dan besar. Penarikan sampelnya dengan menggunakan metode sampling satu tahap, yaitu secara *systematic linear sampling*. Pemilihan sampel untuk survei perusahaan konstruksi tahun 2023 dilakukan secara *independent* pada masing-masing skala perusahaan.

Dengan pertimbangan jumlah populasi perusahaan konstruksi dan keterwakilan sampel pada setiap skala perusahaan serta keterbandingan data dari hasil survei sejenis sebelumnya, maka ditetapkan bahwa jumlah sampel pada setiap skala perusahaan konstruksi pada Survei Perusahaan Konstruksi Tahunan 2023 adalah sebagai berikut:

- a. Jumlah sampel perusahaan konstruksi skala besar adalah 1.356 artinya seluruh perusahaan konstruksi skala besar yang ada dilakukan pencacahan lengkap (*take all*).
- b. Jumlah sampel perusahaan konstruksi skala menengah adalah 5.281, dengan demikian pencacahan dilakukan hanya pada perusahaan konstruksi skala menengah terpilih (*take some*).
- c. Jumlah sampel perusahaan konstruksi

## **6. Wages of Casual Worker**

*Wages is all expenses paid to the casual worker either in the form of money or goods as compensation.*

## **7. Value of Construction Works Completed**

*Value of construction works completed is the total value of work completed by contractor (excluding value of land) based on the progress of project in a certain period of time, based on the contract value between bowheer and contractor.*

## **METHODOLOGY**

### **1. Sample**

*Annual Construction Establishment Survey covers construction establishments operating in Indonesia.*

*In 2023 Annual Construction Establishment Survey, they were 10,000 sample selected which include small establishment, medium establishment, and large establishment. The sampling method was one-stage sampling method that is a linear systematic sampling. The sample selection for construction establishment survey in 2023 was conducted independently for each scale of establishment.*

*Considering the number of establishments population and sample representativeness for each scale and also for data comparability with previous results, the number of sample for each scale of establishment in 2023 Annual Construction Establishment Survey was decided as below:*

- a. *The number of large scale construction establishments sample was 1,356. It means that the enumeration was conducted for all large scale construction establishments (take all).*
- b. *The number of medium scale construction establishments sample was 5,281. It means that the enumeration was conducted only to the selected medium scale construction establishment (take some).*
- c. *The number of small scale construction*

skala kecil adalah 3.363, dengan demikian sebagaimana halnya pada perusahaan konstruksi skala menengah, pencacahan dilakukan hanya pada perusahaan konstruksi skala kecil terpilih (*take some*).

Sedangkan untuk Survei Perusahaan Konstruksi Triwulan merupakan subsampel dari sampel Survei Perusahaan Konstruksi Tahunan, sehingga kerangka sampel perusahaan konstruksi untuk Survei Perusahaan Konstruksi Triwulan adalah daftar perusahaan konstruksi yang terpilih pada Survei Perusahaan Konstruksi Tahunan. Perusahaan yang terpilih pada triwulan I akan terus diamati pada triwulan II, triwulan III dan triwulan IV (sampel panel/berulang). Pada tahun 2023, jumlah sampel Survei Perusahaan Konstruksi Triwulan adalah sebagai berikut :

- Jumlah sampel perusahaan konstruksi skala besar adalah 840 perusahaan, artinya seluruh perusahaan konstruksi skala besar yang ada dilakukan pencacahan lengkap (*take all*).
- Jumlah sampel perusahaan konstruksi skala menengah adalah 2.160 perusahaan, dengan demikian pencacahan dilakukan hanya pada perusahaan konstruksi skala menengah terpilih (*take some*).
- Sedangkan untuk perusahaan konstruksi skala kecil tidak terkena sampel.

## 2. Penghitungan

### 2.1. Rasio Konstruksi

Perhitungan rasio pekerja tetap konstruksi, hari-orang pekerja harian, balas jasa dan upah pekerja konstruksi, balas jasa pekerja tetap konstruksi, upah pekerja harian konstruksi, serta nilai konstruksi yang diselesaikan triwulan menggunakan rasio konstruksi. Formula rasio tersebut adalah sebagai berikut:

$$R_t = \frac{\sum_{i=1}^n Q_{it}}{\sum_{i=1}^n Q_{i(t-1)}} \quad (1)$$

dimana,

$R_t$  = Rasio pekerja tetap, hari-orang, balas

establishments sample was 3,363. Having a similar sampling with medium scale construction establishment, the enumeration was only conducted to the selected small scale construction establishment (*take some*).

Meanwhile, sample of Quarterly Construction Establishment Survey is a subsample of the sample of Annual Construction Establishment Survey, so that the sampling frame of the Quarterly Construction Establishment Survey is the list of establishments selected in the Annual Construction Establishment Survey. The selected establishments as sample on the 1<sup>st</sup> quarter will be continuously observed on the 2<sup>nd</sup> quarter, the 3<sup>rd</sup> quarter and the 4<sup>th</sup> quarter (panel sample/recurred). In 2023, the number of sample of Quarterly Construction Establishment Survey was decided as below :

- Number of large scale construction establishments sample was 840. It means that the enumeration was conducted for all large scale construction establishments (*take all*).
- Number of medium scale establishments sample was 2,160. It means that the enumeration was conducted only to the selected medium scale establishment (*take some*).
- As small scale construction establishment was not enumerated.

### 2. Calculation

#### 2.1 Construction Ratio

The quarterly ratio for construction permanent workers, mandays of casual workers, compensation and wages of construction workers, compensation of construction permanent workers, wages of construction casual workers , and value of construction works completed are calculated by using construction ratio. The ratio formula is as follows:

$$R_t = \frac{\sum_{i=1}^n Q_{it}}{\sum_{i=1}^n Q_{i(t-1)}} \quad (1)$$

where,

$R_t$  = Ratio of permanent workers, mandays,

jasa dan upah, balas jasa, upah, nilai konstruksi yang diselesaikan pada triwulan ke-t

$Q_{it}$  = Jumlah pekerja tetap, hari-orang, balas jasa dan upah, balas jasa, upah, nilai konstruksi yang diselesaikan perusahaan ke i pada triwulan ke t

$Q_{(t-1)i}$  = Jumlah pekerja tetap, hari-orang, balas jasa dan upah, balas jasa, upah, nilai konstruksi yang diselesaikan pada perusahaan ke i triwulan ke (t-1)

Nilai konstruksi yang diselesaikan adalah nilai kontrak dikurangi nilai pekerjaan yang disubkontrakkan dikalikan realisasi fisik pekerjaan yang diselesaikan.

$$NK = (NP - NS) \times \%NR \quad (2)$$

dimana,

NK = Nilai konstruksi yang diselesaikan

NP = Nilai kontrak proyek

NS = Nilai pekerjaan yang disubkontrakkan ke kontraktor lain

%NR = Persentase realisasi fisik pekerjaan yang diselesaikan

%NR didapat dari persentase pekerjaan yang diselesaikan akhir periode survei dikurangi persentase pekerjaan di awal periode survei.

## 2.2 Indeks Tahun Dasar 2016

Indeks tahun dasar 2016 masing-masing provinsi diperoleh dari dua sumber, yaitu: hasil pengolahan dari Indeks Berantai Triwulanan dan dari data Sensus Ekonomi 2016 dengan metode sebagai berikut:

### 2.2.1 Indeks Berantai Triwulanan

- Indeks yang diolah adalah: pekerja tetap, hari-orang, balas jasa dan upah, balas jasa, upah, serta nilai konstruksi yang diselesaikan.
- Buat nilai indeks sama dengan 100 pada awal triwulan yang ada indeksnya.
- Bagi masing-masing indeks triwulan ke-t dengan rata-rata indeks pada tahun dasar (2016), dan kalikan dengan 100 persen.
- Indeks tahun ke-i, merupakan rata-rata dari indeks triwulan ke-t tahun ke-i.

compensation and wages, compensation, wages, value of construction works completed at  $t^{th}$  quarter

$Q_{it}$  = Number of permanent workers, mandays, compensation and wages, compensation, wages, value of construction works completed company i, at  $t^{th}$  quarter

$Q_{(t-1)i}$  = Number of permanent workers, mandays, compensation and wages, compensation, wages, value of construction works completed company i, at  $(t-1)^{th}$  quarter

Value of construction works completed is value of contract subtracted by value of subcontracted project to other contractors multiplied by physical progress of the project completed.

$$NK = (NP - NS) \times \%NR \quad (2)$$

where,

NK = Value of construction works completed

NP = Contract value of the project

NS = Value of subcontracted project to other contractors

%NR = Percentage of physical progress of the project completed

%NR is percentage of project completed at the end of a survey period subtracted by percentage of project completed at the beginning of survey period.

### 2.2 2016 Base Year Indices

2016 base year indices for each province are obtained from two sources, they are from quarterly chained indices and data of 2016 Economic Census by using those following method:

#### 2.2.1 Quarterly Chained Indices

- Processed indices: permanent workers, mandays, compensation and wages, compensation, wages, and value of construction works completed.
- Make index equals to 100 at the beginning of quarter which has index.
- Divide each index at  $t^{th}$  quarter by average index basic year (2016), and multiply by 100 percent.
- Index at  $i^{th}$  year is the average of index at  $t^{th}$  quarter  $i^{th}$  year.

$$I_{Dt} = \frac{I_t}{Avg(I_D)} \times 100 \quad (3)$$

dimana,

- $I_{Dt}$  = Indeks tahun dasar periode t
- $I_t$  = Indeks pada periode t
- $Avg(I_D)$  = Rata-rata indeks pada tahun dasar 2016

$$I_{Dt} = \frac{I_t}{Avg(I_D)} \times 100 \quad (3)$$

where,

- $I_{Dt}$  = Base year index at  $t^{th}$  period
- $I_t$  = Index at  $t^{th}$  period
- $Avg(I_D)$  = Average index at base year 2016

## 2.2.2 Dari Nilai Statistik Konstruksi Tahunan

- a. Data yang diolah adalah: pekerja tetap, hari-orang, balas jasa dan upah, balas jasa, upah, serta nilai kontruksi yang diselesaikan.
- b. Indeks tahun ke-t merupakan hasil pembagian masing-masing data tahun ke-t dengan data pada tahun dasar 2016 dan dikalikan dengan 100 persen.

$$I_t = \left( \frac{X_t}{X_D} \right) \times 100 \quad (4)$$

dimana,

- $I_t$  = Indeks tahun ke-t
- $X_t$  = Data tahun ke-t
- $X_D$  = Data tahun dasar 2016

$$I_t = \left( \frac{X_t}{X_D} \right) \times 100 \quad (4)$$

where,

- $I_t$  = Index at  $t^{th}$  year
- $X_t$  = Data at  $t^{th}$  year
- $X_D$  = Data at 2016 base year

## 2.2.3 Laju Pertumbuhan

Pertumbuhan menunjukkan pergerakan agregat yang berfluktuasi dari satu waktu tertentu terhadap waktu sebelumnya. Laju pertumbuhan triwulan (q-to-q) dan tahunan (y-on-y) diperoleh dengan cara membagi angka indeks yang diperoleh pada periode t dengan angka indeks periode t-1 dikurangi 1 kemudian dikalikan 100 persen.

$$G_t = \left( \frac{I_t}{I_{t-1}} - 1 \right) \times 100 \quad (5)$$

dimana,

- $G_t$  = Laju pertumbuhan pada periode ke-t
- $I_t$  = Indeks pada periode ke-t
- $I_{t-1}$  = Indeks pada periode ke-(t-1)

## 2.2.3 Growth Rate

The growth rate shows an aggregate fluctuating movement from certain period of time to the previous time. The quarterly (q-to-q) and annual (y-on-y) growth rate are derived from dividing index at  $t^{th}$  period with index at  $(t-1)^{th}$  period subtracted by 1 and multiplied by 100 percent.

$$G_t = \left( \frac{I_t}{I_{t-1}} - 1 \right) \times 100 \quad (5)$$

where,

- $G_t$  = Growth rate at  $t^{th}$  period
- $I_t$  = Index at  $t^{th}$  period
- $I_{t-1}$  = Index at  $(t-1)^{th}$  period

#### **2.2.4 Benchmark Indeks Konstruksi**

*Benchmarking* merupakan suatu teknik yang berkaitan dengan cara pengkombinasian data dengan variabel yang sama dari dua sumber data dan frekuensi yang berbeda : pertama, data yang frekuensinya lebih banyak (seperti Survei Perusahaan Konstruksi Triwulanan), dipercaya tingkat akurasiya lebih rendah karena sampelnya lebih sedikit, dan kedua adalah data yang mempunya frekuensi lebih sedikit (seperti Survei Perusahaan Konstruksi Tahunan), yang diyakini cakupannya lebih lengkap dan selanjutnya dapat lebih dipercaya dalam menyediakan tingkat akurasi atau *benchmark*. Series data tahunan yang tingkat kepercayaannya lebih tinggi digunakan sebagai acuan atau *benchmark* dan diberlakukan terhadap fluktuasi data triwulanan yang diperoleh dari series data triwulanan.

Tujuan utama dari beberapa teknik penggunaan *benchmarking* adalah mendistribusikan perbedaan antara dua series data dengan suatu cara sehingga kecenderungan dari series data hasil akhir lebih mendekati series data aslinya. Seperti diketahui bahwa Metode Proportional Denton merupakan teknik maksimum dari pergerakan jangka pendek dari sumber data triwulanan, sehingga series data hasil *benchmark* tetap dijaga seproporsional mungkin dengan series sumber data aslinya. Hal tersebut dilakukan dengan meminimalkan perbedaan (selisih terkecil) persentase perubahan dari triwulan ke triwulan di dalam series *benchmark* aslinya.

Teknik penghitungannya adalah sebagai berikut: Pertama, selaraskan tingkat pertumbuhan *benchmark* antara variabel pekerja tetap, pekerja harian dengan hari orang, balas jasa dan upah, balas jasa, upah, nilai konstruksi yang diselesaikan, serta PDRB atas dasar harga berlaku sektor konstruksi, dimana pertumbuhan nilai konstruksi yang diselesaikan menjadi pegangan utama. Kemudian masing-masing variabel tersebut dibuat indeks *benchmark* tahun dasar ( $2016=100$ ). Selanjutnya untuk indeks *benchmark* masing-masing variabel tahun sebelum dan sesudah tahun dasar ( $2016$ ) digerakkan dengan pertumbuhan *benchmark*.

Setelah indeks *benchmark* tahunan tahun dasar ( $2016$ ) untuk keenam variabel tersebut diperoleh, lalu dijalankan Program Benchmark

#### **2.2.4 Benchmark of Construction Indices**

*Benchmarking* is a technique of combining data with the same variable from two different sources and frequencies: firstly, data with more frequencies (i.e. Quarterly Construction Establishment Survey) is believed to be less accurate due to small size of samples, and secondly, data with frequencies (i.e. Annual Construction Establishment Survey), is believed to be more complete, so that is more reliable to provide an accurate level or benchmark. Annual data series which is more reliable are used as benchmark and applied to quarterly data fluctuations from the quarterly data series.

*Main goal of using benchmarking techniques is to distribute the difference between two series of data in a particular way so that the final data series is as close as possible to the original series. A well-known benchmarking technique is the Denton Proportional Method which preserves to a maximum degree of the short term movements in the quarterly data source, so that keeps the benchmarked series as proportional as possible to the original data source. That is done by minimizing the differences (least squares sense) of the quarter to quarter ( $q$ -to- $q$ ) percentage changes in the original benchmarked series.*

*The calculation techniques are as follows: Firstly, synchronize the growth rate of benchmark between permanent workers, casual workers with mandays, compensation and wages, compensation, wages, value of construction works completed, and GRDP at current market prices for construction sector, where the growth rate of value of construction completed becomes the major trend. Each variables are then made benchmark indices base year ( $2016=100$ ). After that, for benchmarked indices, each variable before and after base year ( $2016$ ) is being driven by the previous and subsequent benchmarked annual growth.*

*After annual benchmark basic year indices ( $2016$ ) for six variables is obtained, run Benchmark Program by using Denton Proportional Method to*

dengan Metode Proportional Denton untuk mendapatkan indeks *benchmark* triwulan antar tahun dasar untuk masing-masing variabel tersebut.

*obtain quarterly benchmark indices base year 2016 for each variable.*

A photograph of a large-scale construction project. In the foreground, a multi-story building under construction is visible, featuring a mix of concrete and red brickwork. Several construction cranes are positioned around the site, with one prominent crane in the center-left and another on the right side. The sky is clear and blue.

|  |                                   |                       |  |                             |   |   |  |   |   |             |

<sup>4)</sup> Nilai Kontrak/Pekerjaan adalah nilai kontrak/pekerjaan yang dikerjakan oleh pihak pemborong berdasarkan surat perjanjian, surat perintah kerja antara pihak pekerjaan (pihak I) dengan penerima pekerjaan (pihak II) dalam jangka tertentu dan jumlah biaya tertentu.

<sup>5)</sup> Nilai Pekerjaan yang Disubkontrakkan adalah nilai pekerjaan yang diberikan ke pihak lain dalam rangka penyelesaian suatu proyek meliputi pekerjaan yang disubkontrakkan seluruhnya (bahan/material dan tenaga kerja disediakan oleh subkontraktor), atau hanya sebagian saja, atau tenaga kerjanya saja s/d tanggal 31 Desember 2023.

<sup>6)</sup> Biaya Bahan/Material adalah seluruh nilai bahan/material yang dipakai untuk setiap pekerjaan baik yang disediakan perusahaan kontraktor maupun yang disediakan pemilik pekerjaan.

<sup>7)</sup> Nilai Konstruksi yang Diselesaikan adalah nilai kontrak/pekerjaan dikurangi nilai pekerjaan yang disubkontrakkan dikalikan persentase pekerjaan yang diselesaikan ditambah biaya bahan/material yang disediakan pemilik pekerjaan selama tahun 2023.
